January 2, 2018

Request for sponsors to support the BFC IAEI Give Back to The Community Program

Dear Electrical Professional:

Each year, The International Association of Electrical Inspectors (IAEI), Benjamin Franklin Chapter offers our "Give Back to the Community" program. We have been very successful in honoring local students and wish to continue the practice. It is our intention to broaden the horizons of gifted students and we wish to expand the project with even greater participation this year.

Give Back to the community program Mission Statement: Promote the skilled electrical trades as a career path for students actively engaged in an accredited electrical related vocational/technical school program, recognize and reward exceptional student performance and commitment in electrical related vocational/technical school programs and to promote the continuing education and networking benefits of membership in and participation in the programs of the International Association of Electrical Inspectors.

In the past, program concentration was on Graduating Seniors, however, last year we decided to consider **all** Students in accredited vocational/technical school programs thereby providing incentive for younger students to excel.

The Chapter is promoting the Electrical Industry as a rewarding career choice and is therefore providing help for the students who are preparing to enter the Electrical Industry as a career path. The student selected by the classroom instructor will be invited to attend the IAEI chapter dinner meeting and electrical trade show on Tuesday evening May 15, 2018 to be recognized by our chapter and receive a framed certificate of achievement. The student will also receive a \$100 gift certificate to use toward the purchase of hand tools for their personal use. The certificate will be paid for by an IAEI sponsor and can be used at any Colonial Electric Supply House. The student must be accompanied to the meeting by their parent or guardian and/or their instructor. A complimentary meal will be provided for the student, the instructor and the parent/guardian.

The BFC IAEI Give Back To The Community Program is possible through the generous donations of our sponsors to the BFC Foundation Inc., A Pennsylvania Non-Profit Corporation. Please consider helping us continue this valuable program by submitting your generous tax-deductible donation in any amount to the BFC Foundation Inc. Please submit your donation to any of our board members and a receipt will be provided for tax purposes. Additionally, all sponsors receive a framed certificate of appreciation for supporting our program and will be recognized at our awards presentation May 15, 2018.

Thank You in advance for your generous sponsorship of our program
